## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a–z, A–Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### **Answer**

```
import java.util.*;  
  
public class Main {  
    public static void main(String[] args) {  
        Scanner s = new Scanner(System.in);  
        String t = s.nextLine();  
        String[] w = t.split(" ");  
        List<String> r = new ArrayList<>();  
        for (String x : w) {  
            if (x.length() >= 2 && x.matches("[a-zA-Z]+")) {  
                r.add(x);  
            }  
        }  
        if (r.isEmpty()) {  
            System.out.println("No valid words.");  
        } else {  
            System.out.println(String.join(" ", r));  
        }  
    }  
}
```

**Status :** Correct

**Marks :** 10/10
